DETAILED ACTION

Allowable Subject Matter

1. The following is a statement of reasons for the indication of allowable subject matter:

While Lovell et al. ("US 2002/0074953 A1") and Wong ("US 2005/0213775 A1") and Plishner ("US 2004/0132337 A1") disclose a transfer of sound source signal comprising a voltage dividing circuit with a socket being provided with a first terminal, a second terminal, a third terminal, a fourth terminal and a fifth terminal, wherein said first terminal is connected to the ground. With a detective device installed and an IC device being connected to perform multiple functions. However, The prior arts of record fail to anticipate or render obvious the further limitations as claimed: When there is no sound source plug in, said fourth terminal and fifth terminal keep electrical contact to form a detective circuit and said socket adapter J1 connecting a resistor R1 in parallel said socket adapter J2 connecting a resistor R2 in parallel and said socket adapter J3 connecting a resistor R3 in parallel; and the sound source plug being able to electrically contact the second terminal and the third terminal and to drive the insulator to separate the fourth terminal from the fifth terminal so detective circuit being in off state. The rear IC device measure the resistance of the sound source plug by the voltage dividing circuit so that the type of sound source plug being able to be determined and the transfer processing of the signals from the sound source being able to be executed exactly.

Any comments considered necessary by the applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays,

should preferably accompany the issue fee. Such submissions should be clearly labeled "comment on statement of Reasons for Allowance".
